DETAILED ACTION

1. Claims 1-20 have been cancelled. Claims 21-40 are now pending.

Double Patenting

2. The applicant has deferred filing a terminal disclaimer until the claims are placed in condition for allowance. Applicant is reminded that a reply to an Office action **MUST BE FULLY RESPONSIVE** to the prior Office action. MPEP 714.02. In order to be fully responsive, applicant must address all pending rejections, including the double patenting rejection, and may not defer this issue. The double patenting rejection from the prior Office action is repeated below:

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 and 1-18 of U.S. Patent Nos. 6,064,977 and 6,301,621, respectively. Although the conflicting claims are not identical, they are not

Art Unit: 2141

patentably distinct from each other because the context of the present claimed invention is similar to that of the patented application.
